Subject index

Methods and constructs

Theoretical

Computational methods for electronic structure

Solvent effect on conformational equilibrium: a Monte Carlo study of 1,3-dichloropropane in carbon tetrachloride, S. Madurga, J.C. Paniagua and E. Vilaseca 255 (2000) 123
Infrared spectra of monomeric L-alanine and L-alanine-N-d_3 zwitterions isolated in a KBr matrix, X. Cao and G. Fischer 255 (2000) 195

-CI and valence bond approach

Study of electron polarization and correlation effects in resonant and background electron scattering off CF_3Cl, T. Beyer, B.M. Nestmann and S.D. Peyerimhoff 255 (2000) 1
The nuclear spin–spin coupling constants in methanol and methylamine: geometry and solvent effects, M. Pecul and J. Sadlej 255 (2000) 137
Theoretical study of structures, energetics and vibrational properties of BC_2H_5 species, N. Galland, Y. Hannachi, D.V. Lanzisera and L. Andrews 255 (2000) 205

-perturbative and many body approaches

Ground and excited states of the Ne_3^+ molecule, J. Urban, P. Mach, J. Mášik, I. Hubač and V. Staemmler 255 (2000) 15

-density functional theory

Density functional calculations on simple carbonyl bases: protonation and hydrogen bond formation with water, A.K. Chandra, M.T. Nguyen and T. Zeegers-Huyskens 255 (2000) 149
Structures, vibrational absorption and vibrational circular dichroism spectra of L-alanine in aqueous solution: a density functional theory and RHF study, K. Frimand, H. Bohr, K.J. Jalkanen and S. Suhai 255 (2000) 165
Theoretical study of structures, energetics and vibrational properties of BC_2H_5 species, N. Galland, Y. Hannachi, D.V. Lanzisera and L. Andrews 255 (2000) 205

Algebraic approaches

Algebraic approach to the potential energy surface for the electronic ground state of ozone, Y. Zheng and S. Ding 255 (2000) 217

PII: S0301-0104(00)00111-7

Spin states and magnetic interactions
Exchange variation of zero-field splittings in $[Fe_4S_4]^+$ clusters of ferredoxins with high-spin $S = 3/2$ ground state, M.I. Belinsky 255 (2000) 23
Vibronic model of hyperfine interaction in dimeric mixed-valence clusters, A.V. Palii, M.I. Belinsky and B.S. Tsukerblat 255 (2000) 51
Magnetic exchange interaction between π-electron radicals adsorbed on graphites, N. Tyutyulkov, F. Dietz and K. Müllen 255 (2000) 223
Quantum beats in recombination of spin-correlated radical ion pairs with equivalent protons, V.A. Bagryansky, O.M. Usov, V.I. Borovkov, T.V. Kobzeva and Yu.N. Molin 255 (2000) 237

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)
The nuclear spin–spin coupling constants in methanol and methylamine: geometry and solvent effects, M. Pecul and J. Sadlej 255 (2000) 137
Monitoring laser driven hydrogen atom motion by transient infrared spectroscopy, N. Došlić and O. Kühn 255 (2000) 247
Dielectric relaxations of collagen and elastin in the dehydrated state, V. Samouillan, A. Lamure and C. Lacabanne 255 (2000) 259

Radiative (incl. relativistic) effects on molecules and molecular processes
Kinetic modelling of radiative reacting gas flow under strong nonequilibrium conditions, E.V. Kustova and A. Chikhaoui 255 (2000) 59

Scattering of waves and particles
Study of electron polarization and correlation effects in resonant and background electron scattering off CF_3Cl, T. Beyer, B.M. Nestmann and S.D. Peyerimhoff 255 (2000) 1
Statistical dynamics in rotationally inelastic gas-surface scattering: dynamical Lie algebraic method, Y. Zheng, X. Yi, D. Guan and Q. Meng 255 (2000) 273

Collisional and reactive molecular dynamics with non-frictional forces
Quasiclassical calculation of the chemical reaction Sr + HF, M.-Q. Cai, L. Zhang, B.-Y. Tang, M.-D. Chen, G.-W. Yang and K.-L. Han 255 (2000) 283
Reactant–product decoupling approach to state-to-state reactive scattering H + DH, S. Zhang, Z. Tan, H. Zhang, Y. Zhang and J.Z.H. Zhang 255 (2000) 397

Reactive molecular dynamics including dissipative processes
Monitoring laser driven hydrogen atom motion by transient infrared spectroscopy, N. Došlić and O. Kühn 255 (2000) 247

Molecular dynamics of many particle systems and condensed phases
Thermodynamic, structural, and dynamic study of the N–H···O=C hydrogen bond association in aqueous solution, S. Tolosa, A. Hidalgo and J.A. Sansón 255 (2000) 73
Mandelstam–Brillouin spectra and hyperacoustic velocities dispersion of trideutero-acetonitrile in the liquid state, R.S. Cataliotti, P. Sassi, A. Morresi and G. Paliani 255 (2000) 85

Migration and interaction on grids and lattices
Influence of the local electric field on ionic transport during redox switching of conducting polymers, F. Miomandre, M.N. Bussac, E. Vieil and L. Zuppiroli 255 (2000) 291

Statistical computational methods (incl. Monte Carlo)
Solvent effect on conformational equilibrium: a Monte Carlo study of 1,3-dichloropropane in carbon tetrachloride, S. Madurga, J.C. Paniagua and E. Vilaseca 255 (2000) 123
Influence of the local electric field on ionic transport during redox switching of conducting polymers, F. Miomandre, M.N. Bussac, E. Vieil and L. Zuppiroli 255 (2000) 291

Dynamics of structures, lattices and macromolecular conformations
Triplet sublevels of metal organic complexes – temperature dependence of spin–lattice relaxation, J. Strasser, H.H.H. Homeier and H. Yersin 255 (2000) 301

Non-equilibrium thermodynamic and hydrodynamic theories
Kinetic modelling of radiative reacting gas flow under strong nonequilibrium conditions, E.V. Kustova and A. Chikhaoui 255 (2000) 59

Equilibrium statistical mechanics and thermodynamics
Statistical dynamics in rotationally inelastic gas-surface scattering: dynamical Lie algebraic method, Y. Zheng, X. Yi, D. Guan and Q. Meng 255 (2000) 273
Effect of hydrostatic pressure on phase transitions in spin-crossover 1D systems, S. Klokishner, J. Linares and F. Varret 255 (2000) 317

Time and space correlation functions
Semiclassical description of purely rotational recurrences for collisionless asymmetric top molecules: new results, M.F. Gelin, V.A. Tolkachev and A.P. Blokhin 255 (2000) 111

Experiment

-infrared
Photomobility of $O(^1D)$ atom in solid Ar and its reaction with CF_3I, M. Chen, X. Wang, L. Zhang, Q. Qin and Q. Zheng 255 (2000) 95
Methylation effects on the collisional quenching of vibrationally excited benzene derivatives by unexcited parent molecules, S.Y. Bae, I.-J. Lee and J. Park 255 (2000) 103
Theoretical study of structures, energetics and vibrational properties of BC_2H_5 species, N. Galland, Y. Hannachi, D.V. Lanzisera and L. Andrews 255 (2000) 205

-UV
Photophysical properties of tris-acetylpyrene derivative of a cryptand in different environments, P. Bandyopadhyay, P.K. Bharadwaj, M. Basu Roy, R. Dutta and S. Ghosh 255 (2000) 325
Solvent dependence of the intersystem crossing kinetics of thioxanthone, C. Ley, F. Morlet-Savary, P. Jacques and J.P. Fouassier 255 (2000) 335

-visible
Photophysical properties of tris-acetylpyrene derivative of a cryptand in different environments, P. Bandyopadhyay, P.K. Bharadwaj, M. Basu Roy, R. Dutta and S. Ghosh 255 (2000) 325
Solvent dependence of the intersystem crossing kinetics of thioxanthone, C. Ley, F. Morlet-Savary, P. Jacques and J.P. Fouassier 255 (2000) 335

Photon counting and phase fluorimetry
Quantum beats in recombination of spin-correlated radical ion pairs with equivalent protons, V.A. Bagryansky, O.M. Usov, V.I. Borovkov, T.V. Kobzeva and Yu.N. Molin 255 (2000) 237
Pressure quenching of positronium in solid biphenyl, T. Goworek, T. Suzuki, E. Hamada, K. Kondo and Y. Ito 255 (2000) 347

Electron impact spectroscopy
Dipole (e,e+ ion) coincidence studies of the ionic photofragmentation and photo-ionization of carbonyl sulfide in the valence shell and S 2p, 2s and C 1s inner shell regions (10–300 eV), R. Feng, G. Cooper, Y. Sakai and C.E. Brion 255 (2000) 353

Ultrafast measurements
Solvent dependence of the intersystem crossing kinetics of thioxanthone, C. Ley, F. Morlet-Savary, P. Jacques and J.P. Fouassier 255 (2000) 335

Synchrotron spectroscopies
Photodissociation spectroscopy of ClCN in the vacuum ultraviolet region, K. Kanda, M. Kono, T. Nagata, A. Hiraya, K. Tabayashi and K. Shobatake 255 (2000) 369

Multiple resonance spectroscopy
Laser-induced amplified spontaneous emission from the 3d and *nf* Rydberg states of NO, Y. Ogi, M. Takahashi, K. Tsukiyama and R. Bersohn 255 (2000) 379

Atomic and molecular beam techniques
Statistical dynamics in rotationally inelastic gas-surface scattering: dynamical Lie algebraic method, Y. Zheng, X. Yi, D. Guan and Q. Meng 255 (2000) 273

Light scattering
Mandelstam–Brillouin spectra and hyperacoustic velocities dispersion of trideutero-acetonitrile in the liquid state, R.S. Cataliotti, P. Sassi, A. Morresi and G. Paliani 255 (2000) 85

Calorimetric methods
Dielectric relaxations of collagen and elastin in the dehydrated state, V. Samouillan, A. Lamure and C. Lacabanne 255 (2000) 259

Objects

Bulk systems

Gases
Kinetic modelling of radiative reacting gas flow under strong nonequilibrium conditions, E.V. Kustova and A. Chikhaoui 255 (2000) 59
Methylation effects on the collisional quenching of vibrationally excited benzene derivatives by unexcited parent molecules, S.Y. Bae, I.-J. Lee and J. Park 255 (2000) 103

Laser-induced amplified spontaneous emission from the 3d and *n*f Rydberg states of NO, Y. Ogi, M. Takahashi, K. Tsukiyama and R. Bersohn 255 (2000) 379
Reactant–product decoupling approach to state-to-state reactive scattering H + DH, S. Zhang, Z. Tan, H. Zhang, Y. Zhang and J.Z.H. Zhang 255 (2000) 397

Liquids neat
Mandelstam–Brillouin spectra and hyperacoustic velocities dispersion of trideutero-acetonitrile in the liquid state, R.S. Cataliotti, P. Sassi, A. Morresi and G. Paliani 255 (2000) 85

Liquid mixtures and solutions
Thermodynamic, structural, and dynamic study of the N–H···O=C hydrogen bond association in aqueous solution, S. Tolosa, A. Hidalgo and J.A. Sansón 255 (2000) 73
Solvent effect on conformational equilibrium: a Monte Carlo study of 1,3-dichloropropane in carbon tetrachloride, S. Madurga, J.C. Paniagua and E. Vilaseca 255 (2000) 123
Quantum beats in recombination of spin-correlated radical ion pairs with equivalent protons, V.A. Bagryansky, O.M. Usov, V.I. Borovkov, T.V. Kobzeva and Yu.N. Molin 255 (2000) 237

Crystals
Effect of hydrostatic pressure on phase transitions in spin-crossover 1D systems, S. Klokishner, J. Linares and F. Varret 255 (2000) 317

-neat
Effect of hydrostatic pressure on phase transitions in spin-crossover 1D systems, S. Klokishner, J. Linares and F. Varret 255 (2000) 317
Pressure quenching of positronium in solid biphenyl, T. Goworek, T. Suzuki, E. Hamada, K. Kondo and Y. Ito 255 (2000) 347

Polymers
Magnetic exchange interaction between π-electron radicals adsorbed on graphites, N. Tyutyulkov, F. Dietz and K. Müllen 255 (2000) 223
Influence of the local electric field on ionic transport during redox switching of conducting polymers, F. Miomandre, M.N. Bussac, E. Vieil and L. Zuppiroli 255 (2000) 291

Thin films
Infrared spectra of monomeric L-alanine and L-alanine-N-d_3 zwitterions isolated in a KBr matrix, X. Cao and G. Fischer 255 (2000) 195
Influence of the local electric field on ionic transport during redox switching of conducting polymers, F. Miomandre, M.N. Bussac, E. Vieil and L. Zuppiroli 255 (2000) 291

Low-dimensional materials
Effect of hydrostatic pressure on phase transitions in spin-crossover 1D systems, S. Klokishner, J. Linares and F. Varret 255 (2000) 317

Biological systems
Vibronic model of hyperfine interaction in dimeric mixed-valence clusters, A.V. Palii, M.I. Belinsky and B.S. Tsukerblat 255 (2000) 51

Structures, vibrational absorption and vibrational circular dichroism spectra of L-alanine in aqueous solution: a density functional theory and RHF study, K. Frimand, H. Bohr, K.J. Jalkanen and S. Suhai 255 (2000) 165

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)

Photomobility of O(^{1}D) atom in solid Ar and its reaction with CF_3I, M. Chen, X. Wang, L. Zhang, Q. Qin and Q. Zheng 255 (2000) 95
Semiclassical description of purely rotational recurrences for collisionless asymmetric top molecules: new results, M.F. Gelin, V.A. Tolkachev and A.P. Blokhin 255 (2000) 111

Molecules (neutral and ionic)

Kinetic modelling of radiative reacting gas flow under strong nonequilibrium conditions, E.V. Kustova and A. Chikhaoui 255 (2000) 59
Algebraic approach to the potential energy surface for the electronic ground state of ozone, Y. Zheng and S. Ding 255 (2000) 217
Photodissociation spectroscopy of ClCN in the vacuum ultraviolet region, K. Kanda, M. Kono, T. Nagata, A. Hiraya, K. Tabayashi and K. Shobatake 255 (2000) 369

-diatomic

Laser-induced amplified spontaneous emission from the 3d and *nf* Rydberg states of NO, Y. Ogi, M. Takahashi, K. Tsukiyama and R. Bersohn 255 (2000) 379

-small polyatomics

Study of electron polarization and correlation effects in resonant and background electron scattering off CF_3Cl, T. Beyer, B.M. Nestmann and S.D. Peyerimhoff 255 (2000) 1
Ground and excited states of the Ne_3^+ molecule, J. Urban, P. Mach, J. Mášik, I. Hubač and V. Staemmler 255 (2000) 15
The nuclear spin–spin coupling constants in methanol and methylamine: geometry and solvent effects, M. Pecul and J. Sadlej 255 (2000) 137
Theoretical study of structures, energetics and vibrational properties of BC_2H_5 species, N. Galland, Y. Hannachi, D.V. Lanzisera and L. Andrews 255 (2000) 205
Dipole (e,e+ ion) coincidence studies of the ionic photofragmentation and photo-ionization of carbonyl sulfide in the valence shell and S 2p, 2s and C 1s inner shell regions (10–300 eV), R. Feng, G. Cooper, Y. Sakai and C.E. Brion 255 (2000) 353
Reactant–product decoupling approach to state-to-state reactive scattering H + DH, S. Zhang, Z. Tan, H. Zhang, Y. Zhang and J.Z.H. Zhang 255 (2000) 397

-aromatics

Methylation effects on the collisional quenching of vibrationally excited benzene derivatives by unexcited parent molecules, S.Y. Bae, I.-J. Lee and J. Park 255 (2000) 103

-dimers

Vibronic model of hyperfine interaction in dimeric mixed-valence clusters, A.V. Palii, M.I. Belinsky and B.S. Tsukerblat 255 (2000) 51

-clusters
Exchange variation of zero-field splittings in $[Fe_4S_4]^+$ clusters of ferredoxins with high-spin $S = 3/2$ ground state, M.I. Belinsky 255 (2000) 23

-complexes
Density functional calculations on simple carbonyl bases: protonation and hydrogen bond formation with water, A.K. Chandra, M.T. Nguyen and T. Zeegers-Huyskens 255 (2000) 149
Triplet sublevels of metal organic complexes – temperature dependence of spin–lattice relaxation, J. Strasser, H.H.H. Homeier and H. Yersin 255 (2000) 301

Free radicals (incl. hydronium and muonium)
Quantum beats in recombination of spin-correlated radical ion pairs with equivalent protons, V.A. Bagryansky, O.M. Usov, V.I. Borovkov, T.V. Kobzeva and Yu.N. Molin 255 (2000) 237

Proteins
Exchange variation of zero-field splittings in $[Fe_4S_4]^+$ clusters of ferredoxins with high-spin $S = 3/2$ ground state, M.I. Belinsky 255 (2000) 23
Dielectric relaxations of collagen and elastin in the dehydrated state, V. Samouillan, A. Lamure and C. Lacabanne 255 (2000) 259

Phenomena

Molecular structure
Ground and excited states of the Ne_3^+ molecule, J. Urban, P. Mach, J. Mášik, I. Hubač and V. Staemmler 255 (2000) 15
Solvent effect on conformational equilibrium: a Monte Carlo study of 1,3-dichloropropane in carbon tetrachloride, S. Madurga, J.C. Paniagua and E. Vilaseca 255 (2000) 123
The nuclear spin–spin coupling constants in methanol and methylamine: geometry and solvent effects, M. Pecul and J. Sadlej 255 (2000) 137
Density functional calculations on simple carbonyl bases: protonation and hydrogen bond formation with water, A.K. Chandra, M.T. Nguyen and T. Zeegers-Huyskens 255 (2000) 149
Infrared spectra of monomeric L-alanine and L-alanine-N-d_3 zwitterions isolated in a KBr matrix, X. Cao and G. Fischer 255 (2000) 195
Theoretical study of structures, energetics and vibrational properties of BC_2H_5 species, N. Galland, Y. Hannachi, D.V. Lanzisera and L. Andrews 255 (2000) 205

Vibrations and rotations of molecules
Semiclassical description of purely rotational recurrences for collisionless asymmetric top molecules: new results, M.F. Gelin, V.A. Tolkachev and A.P. Blokhin 255 (2000) 111
Infrared spectra of monomeric L-alanine and L-alanine-N-d_3 zwitterions isolated in a KBr matrix, X. Cao and G. Fischer 255 (2000) 195

Electronic structure and states
Ground and excited states of the Ne_3^+ molecule, J. Urban, P. Mach, J. Mášik, I. Hubač and V. Staemmler 255 (2000) 15

Exchange variation of zero-field splittings in $[Fe_4S_4]^+$ clusters of ferredoxins with high-spin $S = 3/2$ ground state, M.I. Belinsky 255 (2000) 23
Vibronic model of hyperfine interaction in dimeric mixed-valence clusters, A.V. Palii, M.I. Belinsky and B.S. Tsukerblat 255 (2000) 51
Structures, vibrational absorption and vibrational circular dichroism spectra of L-alanine in aqueous solution: a density functional theory and RHF study, K. Frimand, H. Bohr, K.J. Jalkanen and S. Suhai 255 (2000) 165
Photodissociation spectroscopy of ClCN in the vacuum ultraviolet region, K. Kanda, M. Kono, T. Nagata, A. Hiraya, K. Tabayashi and K. Shobatake 255 (2000) 369
Laser-induced amplified spontaneous emission from the 3d and *n*f Rydberg states of NO, Y. Ogi, M. Takahashi, K. Tsukiyama and R. Bersohn 255 (2000) 379

Electric and magnetic properties
The nuclear spin–spin coupling constants in methanol and methylamine: geometry and solvent effects, M. Pecul and J. Sadlej 255 (2000) 137
Magnetic exchange interaction between π-electron radicals adsorbed on graphites, N. Tyutyulkov, F. Dietz and K. Müllen 255 (2000) 223

Spin splittings
Exchange variation of zero-field splittings in $[Fe_4S_4]^+$ clusters of ferredoxins with high-spin $S = 3/2$ ground state, M.I. Belinsky 255 (2000) 23
Triplet sublevels of metal organic complexes – temperature dependence of spin–lattice relaxation, J. Strasser, H.H.H. Homeier and H. Yersin 255 (2000) 301

Molecular interactions
Thermodynamic, structural, and dynamic study of the N–H···O=C hydrogen bond association in aqueous solution, S. Tolosa, A. Hidalgo and J.A. Sansón 255 (2000) 73
Solvent effect on conformational equilibrium: a Monte Carlo study of 1,3-dichloropropane in carbon tetrachloride, S. Madurga, J.C. Paniagua and E. Vilaseca 255 (2000) 123
Algebraic approach to the potential energy surface for the electronic ground state of ozone, Y. Zheng and S. Ding 255 (2000) 217
Reactant–product decoupling approach to state-to-state reactive scattering H + DH, S. Zhang, Z. Tan, H. Zhang, Y. Zhang and J.Z.H. Zhang 255 (2000) 397

Spectral bandshapes and intensities
Dipole (e,e+ ion) coincidence studies of the ionic photofragmentation and photo-ionization of carbonyl sulfide in the valence shell and S 2p, 2s and C 1s inner shell regions (10–300 eV), R. Feng, G. Cooper, Y. Sakai and C.E. Brion 255 (2000) 353

Energy transfer processes
Methylation effects on the collisional quenching of vibrationally excited benzene derivatives by unexcited parent molecules, S.Y. Bae, I.-J. Lee and J. Park 255 (2000) 103
Statistical dynamics in rotationally inelastic gas-surface scattering: dynamical Lie algebraic method, Y. Zheng, X. Yi, D. Guan and Q. Meng 255 (2000) 273

Molecular photophysical processes
Kinetic modelling of radiative reacting gas flow under strong nonequilibrium conditions, E.V. Kustova and A. Chikhaoui 255 (2000) 59

Photophysical properties of tris-acetylpyrene derivative of a cryptand in different environments, P. Bandyopadhyay, P.K. Bharadwaj, M. Basu Roy, R. Dutta and S. Ghosh 255 (2000) 325
Solvent dependence of the intersystem crossing kinetics of thioxanthone, C. Ley, F. Morlet-Savary, P. Jacques and J.P. Fouassier 255 (2000) 335
Dipole (e,e+ ion) coincidence studies of the ionic photofragmentation and photo-ionization of carbonyl sulfide in the valence shell and S 2p, 2s and C 1s inner shell regions (10–300 eV), R. Feng, G. Cooper, Y. Sakai and C.E. Brion 255 (2000) 353

Photochemistry

Photophysical properties of tris-acetylpyrene derivative of a cryptand in different environments, P. Bandyopadhyay, P.K. Bharadwaj, M. Basu Roy, R. Dutta and S. Ghosh 255 (2000) 325
Photodissociation spectroscopy of ClCN in the vacuum ultraviolet region, K. Kanda, M. Kono, T. Nagata, A. Hiraya, K. Tabayashi and K. Shobatake 255 (2000) 369

Intramolecular dynamics

Monitoring laser driven hydrogen atom motion by transient infrared spectroscopy, N. Došlić and O. Kühn 255 (2000) 247
Solvent dependence of the intersystem crossing kinetics of thioxanthone, C. Ley, F. Morlet-Savary, P. Jacques and J.P. Fouassier 255 (2000) 335

Luminescence spectra, yields and lifetimes

Photodissociation spectroscopy of ClCN in the vacuum ultraviolet region, K. Kanda, M. Kono, T. Nagata, A. Hiraya, K. Tabayashi and K. Shobatake 255 (2000) 369

Coherence loss processes

Quantum beats in recombination of spin-correlated radical ion pairs with equivalent protons, V.A. Bagryansky, O.M. Usov, V.I. Borovkov, T.V. Kobzeva and Yu.N. Molin 255 (2000) 237

-isolated molecules

Photomobility of $O(^1D)$ atom in solid Ar and its reaction with CF_3I, M. Chen, X. Wang, L. Zhang, Q. Qin and Q. Zheng 255 (2000) 95

-collisional

Study of electron polarization and correlation effects in resonant and background electron scattering off CF_3Cl, T. Beyer, B.M. Nestmann and S.D. Peyerimhoff 255 (2000) 1
Quasiclassical calculation of the chemical reaction Sr + HF, M.-Q. Cai, L. Zhang, B.-Y. Tang, M.-D. Chen, G.-W. Yang and K.-L. Han 255 (2000) 283
Reactant–product decoupling approach to state-to-state reactive scattering H + DH, S. Zhang, Z. Tan, H. Zhang, Y. Zhang and J.Z.H. Zhang 255 (2000) 397

Electron transfer

Vibronic model of hyperfine interaction in dimeric mixed-valence clusters, A.V. Palii, M.I. Belinsky and B.S. Tsukerblat 255 (2000) 51

Photophysical properties of tris-acetylpyrene derivative of a cryptand in different environments, P. Bandyopadhyay, P.K. Bharadwaj, M. Basu Roy, R. Dutta and S. Ghosh 255 (2000) 325

Proton and hydrogen atom transfer
Monitoring laser driven hydrogen atom motion by transient infrared spectroscopy, N. Došlić and O. Kühn 255 (2000) 247

Positron annihilation
Pressure quenching of positronium in solid biphenyl, T. Goworek, T. Suzuki, E. Hamada, K. Kondo and Y. Ito 255 (2000) 347

Molecular motion (incl. diffusive)
Photomobility of O(^{1}D) atom in solid Ar and its reaction with CF_3I, M. Chen, X. Wang, L. Zhang, Q. Qin and Q. Zheng 255 (2000) 95
Dielectric relaxations of collagen and elastin in the dehydrated state, V. Samouillan, A. Lamure and C. Lacabanne 255 (2000) 259

Collective motion and excitations
Mandelstam–Brillouin spectra and hyperacoustic velocities dispersion of trideutero-acetonitrile in the liquid state, R.S. Cataliotti, P. Sassi, A. Morresi and G. Paliani 255 (2000) 85

-surface scattering
Statistical dynamics in rotationally inelastic gas-surface scattering: dynamical Lie algebraic method, Y. Zheng, X. Yi, D. Guan and Q. Meng 255 (2000) 273

Thermodynamic and transport properties
Thermodynamic, structural, and dynamic study of the N–H···O=C hydrogen bond association in aqueous solution, S. Tolosa, A. Hidalgo and J.A. Sansón 255 (2000) 73
Influence of the local electric field on ionic transport during redox switching of conducting polymers, F. Miomandre, M.N. Bussac, E. Vieil and L. Zuppiroli 255 (2000) 291

Structure of solids, liquids and glasses
Thermodynamic, structural, and dynamic study of the N–H···O=C hydrogen bond association in aqueous solution, S. Tolosa, A. Hidalgo and J.A. Sansón 255 (2000) 73

Critical behaviour and phase transitions
Effect of hydrostatic pressure on phase transitions in spin-crossover 1D systems, S. Klokishner, J. Linares and F. Varret 255 (2000) 317
